ABSTRACT:

The idea of this paper is to highlight the importance of logistics during action to reduce the impact of pollution disasters in order to minimizing the damage occurred.

Disaster management aims to minimize and diminish the effects of a disaster In the pre-disaster phase. And the importance of which could benefit from the application of logistics in the fight against marine pollution, which lead to the reduction of marine pollution disaster.

Oil spills can affect everything around it, anything underneath it, and anywhere above it. The things that may be found around, underneath or above this oil spillage area are the wildlife and the habitats.

Therefore it was necessary to try and provide a solution to reduce the oil spill disaster and contribute to the preservation of a clean environment

Keyword: Disaster- pollutions - oil – logistics - spill
