The Arab Academy for Science, Technology & Maritime Transport (AASTMT) operating as the Egyptian Merchant Marine Academy. Throughout its 40 years history, AASTMT has succeeded in preparing qualified men and women for successful careers in the marine industry. The maritime industry incorporates a number of activities: international business practice; intermodal transportation; and of course, operating ships. The AASTMT serves, and is supported by, the broad scope of the maritime industry in offering undergraduate and graduate programs in maritime transport technology, and a master's degree in transportation management and Nautical Science.

AASTMT provides quality Maritime Education, and offers Training and Consultancy that is approved by "International Maritime Organization" IMO for all Arab and African countries. Our certificates satisfy the requirements of the "International Convention on Standards of Training, Certification and Watch keeping for Seafarers" STCW and Manila 2010 amendments requirements and internationally approved. Our graduates are guided during their studies by offering practical training, short courses, orientation programs and seminars.

**Internationalism** The AASTMT gives special importance to strengthening cooperation in the fields of education, training and research with the United Nations' specialized organizations and on top of them is the International Maritime Organization (IMO) and the world Maritime university (WMU).

The United Nations delegated a joint committee of its concerned organizations to study the region's need for this project, (UNDP) prepared document number (REM/71L286/01/19) for the project of establishing the Arab Academy for Maritime Transport in Alexandria in cooperation with the International Maritime Consultancy Organization of Governments as an executive agency of the project and the United Nations Conference for Trade and Development as a participant (UNCTAD).

The AASTMT's relations with several specialized organizations and countries of a deep-rooted history in international transport, science and technology have been known for their diversity and excellence not only on the regional level, but also on the international one.

**The outstanding cooperation between the AASTMT and several international bodies has pushed the AASTMT from regionalism to internationalism.**

## Maritime Education & Training Center of Excellence

### ■ College of Maritime Transport & Technology

The College educates qualified personnel to become licensed officers in addition to Bachelor degree to serve in the international merchant marine fleets.

### ■ Sea Training Institute

Trains cadets on the training vessel "AIDA 4" by adopting a guided sea training program beside the existing planned sea training program.
