

The image below shows the location of a public park near the College of Engineering and Technology. Your task is to re-design the given area as a public park that provides the following:

1. An interesting design idea and program that satisfy the needs of the users
2. Paved spaces and paths that provide access to the different zones
3. Seating and shading for pedestrians (consider the given north direction)
4. Green areas and planting design
5. A single water feature, such as a pool or fountain (not more than 100 m<sup>2</sup>)
6. You may add small buildings (not more than 100 m<sup>2</sup>) to use as facilities or kiosks
